

ls Command Guide

1. Basic list

- **Command:** `ls`
- **Use:** Lists files and directories in the current directory.
- **Example:**

```
ls
```

2. List with detailed information

- **Command:** `ls -l`
- **Use:** Shows detailed info like permissions, owner, size, and modification date.
- **Example:**

```
ls -l
```

3. List including hidden files

- **Command:** `ls -a`
- **Use:** Shows all files including hidden files (starting with `.`).
- **Example:**

```
ls -a
```

4. Long listing with human-readable sizes

- **Command:** `ls -lh`
- **Use:** Shows detailed info with file sizes in KB, MB, or GB.
- **Example:**

```
ls -lh
```

5. List files sorted by modification time

- **Command:** `ls -lt`
- **Use:** Sorts files by modification time, newest first.
- **Example:**

```
ls -lt
```
