

Git Help Command Guide

1. Basic help

- **Command:** `git help`
- **Use:** Displays a general overview of Git commands.
- **Example:**

```
git help
```

2. Help for a specific command

- **Command:** `git help <command>`
- **Use:** Shows detailed documentation for a specific Git command.
- **Example:**

```
git help commit
```

3. Using `--help` option

- **Command:** `<command> --help`
- **Use:** Alternative way to get help for a specific Git command.
- **Example:**

```
git commit --help
```

4. Open help in web browser

- **Command:** `git help -w <command>`
- **Use:** Opens the help page for a command in your default web browser.
- **Example:**

```
git help -w log
```

5. Search for help topics

- **Command:** `git help -g`
- **Use:** Lists all guides and manual pages available.
- **Example:**

```
git help -g
```
